

WWF

A lobbying effort

fueled by **your** donations

By Luke El Dib

About WWF

- The **World Wildlife Fund** for Nature (or WWF) is a Swiss NGO founded in 1961.
- They are primarily donation-based.
- Their mission statement is to prevent more species from going extinct, and help endangered species to survive declining populations.

Problem

- Not enough **donations**.
- Leading cause of extinction is habitat loss, brought upon by human activity.
- Global wildlife populations have declined by **69%** since 1970.
- Legislation seems like the only reasonable solution

Target audience

- **Gen-z** and **Millennials**.
- Those who are feel powerless, cynical and hopeless about ongoing environmental issues.
- These feelings are brought upon by the public perception that previous environmental efforts have been fruitless thusfar

Campaign Objective

- **Gather donations to lobby the government to push for a carbon tax and faze out fossil fuels.**
- **Would need a considerable amount of donations to be able to afford to fight fuel lobbyists at their own game.**
- **Show the broader population that there is a real material change that they can be part of.**
